## Products Available

### Single Gas Detector

The UNI single gas detector offers a simple portable solution for the widest array of toxic gas and oxygen application on the market.

### Maintenance-Free Single Gas Detector

The UNI 321 is a disposable, maintenance-free version of the UNI single gas monitor.

### Multi-Gas Detector

The POI multi-gas detectors offer 4- or 5-gas monitoring of oxygen, combustibles, numerous toxic gas options, carbon dioxide, and volatile organic compounds.

### Compact Diffusion Multi-Gas Detector

The MUNI MP420 is a compact and lightweight 4-gas detector with four standard sensors for oxygen, combustibles, carbon monoxide, and hydrogen sulfide.

### Photo-Ionization Detector

The NEO is one of the most advanced handheld VOC monitors available for parts per billion detection.

## Why Choose Us?

Each detector is created with a focus on protecting the men and women working in emergency services, oil and gas, refineries, etc.

Products are created by a safety-focused team of seasoned engineers and professionals with, collectively, over 100 years of experience.

Each detector is of professional grade and possesses an array of high quality features.

Certified Distributor of mPower Gas Detectors
